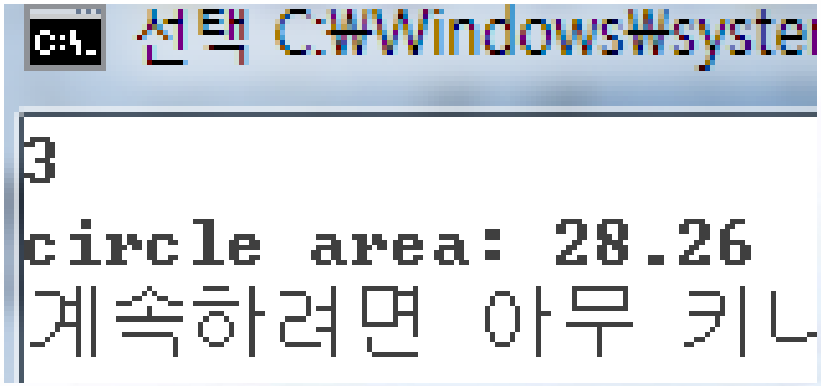
Quiz #3 Write a program that calculates a circle area

경희대학교 KYUNG HEE UNIVERSITY

- The main function calls two functions, "getRadius" and "calCircleArea", sequentially.
  - int getRadius (void)
    - Input parameter : void Return value : radius
    - Obtain a radius of a circle from user input
  - double calCircleArea (int radius)
    - Input parameter : radius Return value : circle area
    - Calculates and returns the area of the circle



- circle area =radius*radius*3.14
